
SPECIALISED PRINTER

PR4 SR

olivetti

In any retail application – from hypermarkets or large department stores to small shops – the operations performed by the printer play a key role. PR4 SR is an easy-to-use specialised printer which ensures reliability and autonomy.

PR4 SR offers advanced capabilities, outstanding productivity in printing and paper management, low noise level and high operating speed that makes it a top performer in its market class. This two-station model – intended for applications where the journal is not requested – handles individual forms and a single paper roll for widths of up to 140 mm. The first station prints either receipts or the journal (a duplicate copy roll must be used if both types of document are required); the second station prints transaction slips, inserted from the top or the front.

TECHNICAL CHARACTERISTICS

Technology

- Dot matrix, 9 needles;
non aligned matrix

Speed

- 250-357 cps

Spacing (dpi)

- 12, 15, 17.1 (Olivetti)
- 12.5, 16.7 (Epson)

Noise level

- Less than 66 dB

Paper handling

- Manual cutter
- Autoloading

Receipts

- 66 characters per line (at 12 dpi)

Journal

- 66 characters per line (at 12 dpi)

Printed line length

- Receipt or journal: 5.5"
- Front or top insertion: 5.5"

Form management

- Front document alignment:
automatic
- Slip introduction:
from front/top
- Cheque introduction:
from front/top
- Number of copies: 1+4
- Receipt cutting: automatic

No. of rolls

- 1

Roll diameter

- 85 mm

Roll width

- 76, 83, 115, 140 mm

Interface

- Parallel, Serial RS 232

Emulations

- Olivetti
- Epson TM-U925

Electrical characteristics

- Power supply
Internal full range (110/240V)
External (240V)
- Absorption 70 W max.

Dimension

- WxDxH: 250x253x185 mm

Weight

- 4.5 kg

Options

- MICR reader (Factory option)
- Customer display and cash
drawer interface
- External slip paper guide
- Journal cover with lock
