### PUT COLOUR TO WORK

The Olivetti d-Color P12 is the ideal digital colour printer for small workgroups and businesses.

With its low cost of ownership, it is perfect for adding a touch of professional colour and quality to your printouts, without the need for costly, top of the range printers.

The d-Color P12 prints everything you need for your work: from letterhead paper to promotionals, from PowerPoint presentations to invitations, diagrams, tables and transparencies, and even banners up to 1.2 metres long.

Furthermore, the Olivetti d-Color P12 is exceptionally simple to operate: colour calibration is automatic and the daily chore of unreliable calibration is no longer necessary.

### COLOUR PERFORMANCE

The Olivetti d-Color P12 offers all its quality and performance at an output speed which puts it at the top of its class. Its tandem print technology results in output speeds of 12 ppm in colour and 20 ppm in monochrome at archival quality, and the oil-free toner makes it easy to write on the printed page. Furthermore, the Olivetti d-Color P12 is already configured for networking and also features a high-speed USB 2.0 port as well as an industry-standard parallel port.

The Olivetti d-Color P12 also has a 64 MB standard memory (expandable to 320 MB) and offers PCL5c emulation. It comes with PostScript 3, the indispensable standard for advanced graphics applications. Finally, it has an optional 10GB hard drive for advanced functionality such as form/letterhead storage.

The bundled drivers ensure that the Olivetti d-Color P12 is compatible with all major operating systems.

### COLOUR WITH STYLE

The Olivetti d-Color P12 makes an impact with its compact, elegant styling: its clean lines fit into any environment and its small footprint means that it will even fit neatly on your office desktop.

### AS MUCH PAPER AS YOU NEED

The Olivetti d-Color P12 sets no limits to your working habits, with exceptional paper capacity: from 300 to 830 sheets, at weights from 75 to 203 gsm.

And the optional front/back feeder allows you to print on both sides of the sheet, to cut your consumables costs even further.

print speed:  
colour – 12 ppm,  
monochrome – 20 ppm

paper capacity from 300  
to 830 sheets
